# Catalytic converter theft

is on the rise in your neighborhood

An exhaust admission control device that reduces toxic gases and pollutants in exhaust gas

Contains valuable metals such as platinum

SUV's, because of their height, (easier to get to converter) and lighter weight cars, such as the Prius, (easier to jack up, if needed) are common targets, but all types of vehicles are prone to this theft. It only takes about 5 minutes to steal your converter.

## What can you do to prevent Catalytic converter thefts?

- Park your car in your garage whenever possible
- Park in a well-lit area
- Set your car alarm to pick up vibrations
- Use motion sensor lights in your driveway
