9/10/22	1730	236 GRAMONT AV	WESTWOOD	The victim's car was entered, and toiletries were stolen.

How to Prevent Having Your Car Stolen

by Cheryl Knight

YOURMECHANIC

Materials Needed

- The Club (or similar device)

Another way to protect your vehicle from theft includes using an immobilization device, such as [The Club](#), which works by locking the steering wheel into place, making it impossible to turn the vehicle. While not a foolproof method to prevent your car from being stolen, it might provide enough of a deterrent to make a potential thief skip your car and go on to the next one.

- **Warning:** While effective for the most part, devices such as The Club probably won't dissuade a determined car thief. The club, in combination with some of the other available methods might provide the best solution in the long run.

Step 1: Place device on steering wheel. After purchasing The Club, place the device at the center of and between both sides of the rim of the steering wheel. The device is made of two pieces that have a protruding hook on each piece that open toward the outer rim of the steering wheel.

Step 2: Secure device onto steering wheel. Next, slide the device out until the hook on each section is fitted securely around opposite sides of the steering wheel. Make sure they are snug against the rim of the steering wheel.

Step 3: Lock the device in place. Lock the two pieces into place. The long handle that protrudes from the device should keep the steering wheel from turning.

- **Tip:** Better yet, have a steering wheel installed that you can take with you when you are away from your car. A thief cannot steal a vehicle that they cannot drive.

You should take the necessary steps to protect your car from theft, especially if you have a newer-model car. When installing devices such as a car alarm or GPS tracking system, consult with an experienced mechanic to advise you and potentially install it to make sure the job is done right.
