

## **Automated license plate readers installed in Dayton**

*Release date: Tuesday, Feb. 7, 2023*

*Contact: James Rider, Police Information Specialist, 937-333-1201*

---

The Dayton Police Department has finished installing fixed-place Automated License Plate Readers (ALPRs). This technology will help officers address community concerns concerning crime.

On July 20, 2022, a public hearing was held at a Dayton City Commission meeting regarding ALPRs in accordance with the City's technology ordinance. After that hearing, the City Commission voted to approve the use of this technology.

The deployment of these cameras comes after a long process of working with the community to identify the neighborhoods wanting this technology. Neighborhood safety plans have been reviewed and approved for Old North Dayton, Westwood, and Twin Towers, in addition to the Downtown Dayton Partnership, including the installation of ALPRs.

License plate readers are intended to provide officers with an automated method of identifying vehicles and license plates connected to criminal activity. The use of ALPR equipment is for official law enforcement purposes only and done in a manner consistent with the manufacturer's recommendations and police department policy.

ALPRs work by scanning the license plate of a vehicle and comparing it to national and local crime databases. It will alert law enforcement of plates associated with potentially stolen vehicles, Amber Alerts, registered owner warrants and terrorist watch lists.

The ALPRs have been installed at the following locations:

### **Old North Dayton Neighborhood**
