

Five red light enforcement cameras to begin warning period at two sites

Release Date: Friday, May 18, 2018

Contact: Cara Zinksi-Neace, Police Information Specialist, 937-333-1201

Five traffic enforcement red light cameras located at two intersections are being activated. Three red light cameras are located at James H. McGee Boulevard and West Third Street, while two others are located at Linden Avenue and South Smithville Road. A 30-day warning period will begin at both locations on Monday, May 21.

During the 30-day warning period, the registered owner of a vehicle committing a violation at the traffic signal will be sent a warning in the mail. After 30 days, citations will be issued by mail.

The activation of these red light cameras completes the Dayton Police Department's current plan for traffic enforcement cameras. Following is a list of fixed site camera locations, along with the current locations of mobile speed trailers.

- * West Third Street at James H. McGee Boulevard (three red light cameras)
- * North Gettysburg Avenue at Fairbanks Avenue (two speed cameras)
- * North Main Street at Siebenthaler Avenue (one speed camera)
- * South Keowee Street between East Third Street and East Fourth Street (two speed cameras)
- * South Smithville Road at Linden Avenue (two red light cameras)
- * Area of Troy Street and Stanley Avenue (two mobile speed trailers)
- * North Main Street near Forest Glen Avenue (one mobile speed trailer).

The Dayton Police Department also utilizes six handheld speed enforcement camera units.

There have been 84 fewer injury crashes (432) to-date in 2018, fewer than during the same period in 2017 (516). Motorists in Dayton are asked to help with traffic safety by slowing down and driving safely.
