

Warming centers are open, waste collection may be delayed

Release Date: Tuesday, Jan. 29, 2019

Contact: Toni Bankston, Public Affairs, 937-333-3616

As a result of extremely cold weather expected on January 30 and 31, the City of Dayton will operate warming centers at three recreation centers during regular business hours, 6 a.m. to 9 p.m.

Warming center locations:

Greater Dayton Recreation Center, 2021 W. Third St.

Northwest Recreation Center, 1600 Princeton Dr.

Lohrey Recreation Center, 2366 Glenarm Ave.

City of Dayton waste collection customers are advised that there may be collection delays on January 30 and 31. Customers are asked to place garbage/recycling at the usual location at the usual date/time and to leave it there until it is picked up.

The Dayton Department of Water also advises residents to take some simple steps to help prevent frozen/broken water pipes and damage during the extreme cold:

- Trickle a small stream of lukewarm water from a faucet in your home.
- Open doors below sinks, especially if the sink is located against an exterior wall.
- If a home's water meter is in an unheated garage or other unheated location, it should be protected with an insulated cover. For water meters

located outdoors in a pit, check to make sure the lid is not broken or missing.

- Know where the master water shut-off control is located in case a broken pipe necessitates turning off the water supply.
