

City developing active transportation plan, asks for community participation

Release date: Wednesday, June 1, 2022

Contact: Susan Vincent, Planner, Dept. of Planning, Neighborhoods & Development, 937-333-3683, susan.vincent@daytonohio.gov

The City of Dayton is developing its first plan for active transportation -- human-powered transportation that engages people in healthy physical activities including walking, bicycling, skateboarding, rollerblading, using strollers, using wheelchairs/mobility devices, and more.

The Active Transportation Plan will identify recommendations for Dayton's bicycle and pedestrian networks and will establish a prioritized project list -- an essential component for securing infrastructure funding. The new plan will incorporate programming and infrastructure recommendations, with a goal of providing equitable access to affordable, safe and convenient transportation.

The City is asking community members to join in the planning process, with an online survey, an interactive online map, outreach events, and more planned through July.

For more information and access to the online resources, go to walkbike.info/dayton.
